Questions

7 of 10 points

✗ What does the following code output? *

0/1

```
function getFavColor(){  
  var favColor2 = "Yellow";  
  let favColor1 = "red";  
}  
getFavColor();  
console.log(favColor2);
```

- ☒ Yellow
- ☐ Red
- ☐ Undefined

✗

Correct answer

- ☒ Undefined

✗ What does the following code output? *

0/1

```
var myData = {  
  name: "Parul",  
  printName: function(role){  
    console.log(name, role)  
  }  
}  
myData.printName("PA");
```

- ☐ "" PA
- ☐ Parul undefined
- ☒ Parul PA

✗

Correct answer

- ☒ "" PA

✓ What does the following code output? *

1/1

```
{  
  const obj = { color: "blue", item: "top" };  
  var obj = { color: "yellow", item: "shirt" };  
  console.log(obj);  
}
```

- ☐ undefined
- ☐ { color: "yellow", item: "shirt" }
- ☒ SyntaxError: Identifier 'obj' has already been declared

✓

✓ What does NaN represent? *

1/1

- ☒ Not-a-Number
- ☐ Negative-and-Number
- ☐ Null-a-Number

✗ What does the following code output? *

0/1

```
function getFavColor(){  
  console.log(favColor1);  
  let favColor1 = "red";  
  var favColor2 = "Yellow";  
}  
getFavColor();
```

- ☐ Throws an error
- ☐ red
- ☒ ""

Correct answer

- ☒ Throws an error

✓ What does the following code output? *

1/1

```
{  
  var obj = { name: "Akanksha", surname: "Choudhary" };  
  var obj = { name: "Tanvi", surname: "Priya" };  
  console.log(obj);  
}
```

- ☐ { name: "Akanksha", surname: "Choudhary" }
- ☐ Type Error: Assignment to var variable
- ☒ { name: "Tanvi", surname: "Priya" }

✓ What does the following code output? *

1/1

```
function getFavColor(){  
  console.log(favColor2);  
  let favColor1 = "red";  
  var favColor2 = "Yellow";  
}  
getFavColor();
```

- ☐ Yellow
- ☐ Red
- ☒ Undefined

✓ What does the following code output? *

1/1

```
{  
  var x = 2;  
  var y = "2";  
  console.log(x == y)  
}
```

- ☐ Returns false since x is a number and y is a string
- ☒ Returns true since the value of both x and y is the same
- ☐ Returns true since both variables are declared using var

✓ What does "this" refer to in the following code? *

1/1

```
var myData = {  
  name: "Parul",  
  printName: function(){  
    console.log(this.name)  
  }  
}  
myData.printName();
```

- ☐ printName
- ☐ name
- ☒ myData

✓ What does the following code output? *

1/1

```
{  
  var x = 3;  
  var y = "3";  
  console.log(x + y)  
}
```

- ☒ 33
- ☐ 6
- ☐ Syntax Error: Cannot add different variable types
